

Unikey is today's most demanded software license control and copy protection dongle (also called Software Lock) built by SecuTech's innovative anti piracy technology & unique architecture. Unikey is different to the competition, providing increased overall security and a broader feature-set. Unikey is completely driverless, with a cute case, has 4k of memory and is ready to protect up to 64 software modules concurrently. A computing engine is embedded inside the dongle and developers can define upto 128 security algorithms for advanced protection. Unikey supports onboard encryption algorithms that provide secure and powerful encryption/decryption functions, and comes with a convenient Developer Defined Password Scheme, Seed Generation Algorithms, Globally Unique Hardware ID, and much more.

Features (Hardware Key)

- Big Memory Up to 4K
- 64 license modules
- 128 User-Defined Algorithms
- 3 Keys Storage
- Computing Engine Embedded
- Remote Update Key
- Globally Unique Hardware ID
- Convenient Password Generation Scheme
- Seed Generation Algorithm
- User-Defined Software ID
- Driverless
- Lead free

Specification

- Operating System: Windows 98SE, ME, 2000, XP, Server 2003, Linux
- Dimensions: 46.5 X 18 X 4 mm ● Weight: <8g ● Min. Operating Voltage: 5V
- Current Consumption: <= 50 mA ● Casing: Hard molded plastic, tamper evident
- Storage Temperature: -10C to 85C ● Humidity Rating: 0-70% without condensation
- Operation Temperature: 0C to 70C ● Memory data retention: At least 10 years
- Memory cell rewriters: At least 100,000

Software

- Envelop Protection without Additional Programming
- Full Set APIs with High Level of Security
- User Friendly Editor to Configure Hardware Keys
- Easy Software Distribution System
- Remote Update Solution
- Data File Encryption
- Friendly demo program illustrating APIs usage

OEM

- Labeling
- Casing
- Authentication Application Development
- Software Protection Value Added Service
- Software Protection Consulting
- Technical Training

Support

- 24 hours technical question response time
- Professional support and sales teams to answer all questions
- Life long guarantee of hardware key
- Online technical training, discussing, communicating
- Looking for qualified partners

SecuTech Software License Management System provides you a user-friendly software module that will make your software protection and software license distribution management never be so fun. Together with our Unikey, it is a combination of Hardware Key + License Management System. Our mission is to provide you the most cost effective software license control and copy protection option, all in 1. With UniKey license management system, you can easily read, write, edit dongles, tracking info from/to dongle distribution database, fully testing/formatting dongles, and update a specific or batch of dongle(s).

Thanks for the UniKey enveloper, developers may protect applications without any additional coding work, and archive flexible protection schemes, such as running-time limitation, timing functions, binding with specific dongles or modules. Meanwhile, with help of UniKey APIs, developer may arrive at high level of security, and more advanced functions are ready to use. In UniKey SDK, we provide full functional samples and various software protection schemes to meet different customers' requirements. Samples are offered in most popular programming languages. Developers can develop their own novel software protection ideas based on UniKey SDK.
